

Guess My Schedule!

Goal: To know your
classmates better as
well to practice your
imagination and
thinking skills

What to do?

1. You will be put in groups and given a person to speak about. Pairing students is the easiest way to do this.
2. Everyone has 30 seconds to think about 3 facts about themselves. Tell this information to your partner afterwards who should write these facts down!
3. With these facts you have to make an assumption about the other person's daily or weekly schedule (You can pick any day of the week, or the week in general)! Each student has 1 minute to describe the other person's schedule!
4. Rate their schedule from 1-10 on how accurate it is. The higher the number, the more accurate it is!

Example

Partner A: These are the 3 facts about me:

1. I like drawing
2. My favourite food is a hamburger
3. I have 2 siblings

Partner B: Hmm, based on your facts, I would say you attend art class twice a week on Monday and Friday, and you have a real interest in Cubism. Your favourite painters are Picasso and Matisse. You love hamburgers and eat them most evenings but this makes your sister unhappy as she is a vegetarian. On Saturdays and Sundays you mostly hangout with your two siblings because your parents are very busy and work on weekends.

Partner A: That's almost correct! I'll give it a 7/10. I only attend art classes on Mondays and my dad works on Saturday.
